Pearson Test of English Academic is the leading, fastest growing computer-based, high stakes English language proficiency test used for admissions and immigration. Pearson, the world leader in educational publishing, developed PTE Academic in response to feedback from higher education to meet the need for an English language test that more accurately measured the communication skills of international students in an academic environment as securely and efficiently as possible. PTE includes 20 different integrated item types (3 parts: speaking and writing, reading, and listening) and is administered in a single 3 hour test session. It is widely accepted by thousands of academic programs in the US, including top public and private universities.

PTE Academic was created in response to demand for a more accurate, secure, relevant, and objective test of English.

Accurate

- Lowest SEM (Standard Error of Measurement) compared to other English language tests
- More granular scale compared to other English language tests, allowing for a greater level of score precision

Secure

- State of the art biometrics applied consistently across all test centers, including digital palm-vein authentication
- Randomized test forms
- Paperless testing and results

Relevant

- Only uses authentic, academic content so students are better prepared to use English at your institution
- Highest number of integrated tasks (11/20 different question types are integrated)

Objective

- Machine scored, responses therefore scored objectively and consistently
- Treats regional accents equally so there is no regional variance in standards
- Highest reliability estimate of overall test score (.97) compared to other English language test
